Given the high rates of co-occurring mental health conditions among clients of AOD treatment services, it is essential that routine screening and assessment be undertaken for these conditions as part of case formulation. Screening is the initial step in the process of identifying possible cases of co-occurring mental health conditions.

### An overview of case formulation

The Biopsychosocial Model and Case Formulation (also known as the Biopsychosocial Formulation) in psychiatry is a way of understanding a patient as more than a diagnostic label. Hypotheses are generated about the origins and causes of a patient's symptoms. The most common and clinically practical way to formulate is through the biopsychosocial approach, first described in 1980 by George Engel. [1]
