Canon 420ex Manual Mode

Flash in Other Picture-Taking Modes M: E-TTL Autoflash and Manual Exposure When you want to set both the shutter speed and aperture, use manual exposure. E-TTL autoflash controls the flash output according to the aperture you set. The background exposure is determined by the shutter speed and aperture combination.

Canon Speedlite 420EX - canon.co.uk

no manual controls for as expensive as it is (at least 1/2, 1/4, and 1/8 power settings would have been neat), although many problems with the 420ex can be overcome now that FEC is included in all of canon's digital cameras (now that the 300d has been retired). this was still a 200+ euro flash (unfortunately i bought it just before the 430ex ...

FM Reviews - Canon Speedlite 420EX TTL

1. On the 600EX, make sure it's in the Master Mode - Optical instead of Radio. I don't have the Yongnuo YN-600EX-RTII but if it works like the Canon, the symbol for optical is a lightning bolt , not an antenna with concentric circles.. 2. Make sure on both the 600EX and the 420EX, the channel number is the same.

Solved: 420EX as optical slave issues - Canon Community

wrote: Martin, I have the other "crippled Canon", the Rebel T7, which is also missing the center x-sync terminal on its hot shoe. However the 420EX flash I got for \$21 on eBay works perfectly on it. It's my first E-TTL

flash and I'm amazed at the beautiful exposures it gives, even in bounce mode...

Re: Canon Speedlite 420EX - Canon Community

This model, the 420EX is just right to meet my needs. Size wise the 420EX is right in the middle. It does not offer any manual controls, although it does support wireless operation. In terms of light output, it is very powerful. I have used it from well more than 100 feet away from my subject with very good results.

Amazon.com : Canon Speedlite 420EX Flash for Canon EOS SLR ...

Manual zoom is also a clumsy mystery. You have to tap the dual function ZOOM button, but don't hold it or you'll get into the wireless options instead. Once you've tapped the ZOOM button properly you see ZOOM blink, and then you use the + and - buttons to change it.

Canon 430EX II Review - Ken Rockwell

When you mount a Canon EX Speedlite in the EOS 6D hot shoe, you can control the output with the camera menu and much more. If you have an EX II Speedlite, you have gobs of control. The following steps show the options you have available with an EX II Speedlite. The options may be different for your Canon Speedlite.

How to Control the External Speedlite on Your Canon EOS 6D ...

Just set the camera's shooting mode to <W> (aperture-priority AE), <X> (shutter-priority AE), or <q> (manual) and you can use E-TTL II/E-TTL autoflash. If you use the <Z> or <Y> shooting mode, the result will be the same as using the <V> (Program AE) mode. 1/X sec. is the camera's maximum flash sync speed.
