Extradosed Prestressed Bridges Florida Department Of

Welcome. The FDOT inspects all public highway bridges in the State. The bridge inventory in Florida ranks among the best in the nation, as a percentage of bridges that are considered "poor" (FHWA's Tables of Frequently Requested NBI Information). The tables below retain two older terms, Structurally Deficient (SD) and Functionally Obsolete (FO).

Abstract. The Extradosed Prestressed Bridge represents a relatively new bridge type. The first of this type bridge was constructed in Japan in 1994, and Japan has since built at least 29 examples of this bridge type. Throughout the rest of the world, another 34 of this bridge type have been built, with most countries having only one, or at most a few, examples.
