Financial Modelling, Theory, Implementation and Practice ...
From Wikipedia, the free encyclopedia Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.

Financial modeling - Wikipedia
Joerg Kienitz and Daniel Wetterau present "Financial Modelling: Theory, Implementation and Practice with MATLAB Source", a great resource on state-of-the-art models in financial mathematics. The authors try to bridge the gap between current research topics and an implementation which can be applied in the real world.

Financial Modelling (with Matlab Source): A great new book ...
The book enables the reader to model, design and implement a wide range of financial models for derivatives pricing and asset allocation, providing practitioners with complete financial modelling workflow, from model choice, deriving prices and Greeks using (semi-) analytic and simulation techniques, and calibration even for exotic options.
