### Fluoroscopy Study Guide Flashcards | Quizlet

Fluoroscopy is a study of moving body structures—similar to an X-ray “movie.” A continuous X-ray beam is passed through the body part being examined. The beam is transmitted to a TV-like monitor so that the body part and its motion can be seen in detail. Fluoroscopy, as an imaging tool, enables physicians to look at many body systems, including the skeletal, digestive, urinary, respiratory, and reproductive systems.

### Fluoroscopy Procedure | Johns Hopkins Medicine

Radiation in Medicine - Fluoroscopy Fluoroscopy is a medical imaging test that uses an x-ray beam that passes continuously through the body to create an image. The image is projected on a monitor which allows doctors to see the movement of internal organs in real-time.
