How The Mind Works

How the Mind Works synthesizes the most satisfying explanations of our mental life from cognitive science, evolutionary biology, and other fields to explain what the mind is, how it evolved, and how it allows us to see, think, feel, laugh, interact, enjoy the arts, and contemplate the mysteries of life.

How the Mind Works: Steven Pinker, Mel Foster ...

The overall thrust is that the mind is a neural computer closely governed by feelings and desires that were shaped by natural selection for their adaptive value in the hunter-gatherer lifestyle of our ancestors. The book is lively, with lots of down to earth examples.

How the Mind Works by Steven Pinker - Goodreads

How the Mind Works is a 1997 book by the Canadian-American cognitive scientist Steven Pinker, in which the author attempts to explain some of the human mind's poorly understood functions and quirks in evolutionary terms. Drawing heavily on the paradigm of evolutionary psychology articulated by John Tooby and Leda Cosmides, Pinker covers subjects such as vision, emotion, feminism, and "the meaning of life".

How the Mind Works - Wikipedia

Our Evaluations Also Offers Clues Into How the Mind Works. First impressions are famous for forming very quickly. Whenever you first meet a new person, you probably very quickly form an impression of who they are and what you think of them. Imagine, for example, that you have just been introduced to a new co-worker.

How the Mind Works: Three Surprising Findings from ...

Pinker explains the mind by "reverse-engineering" it—figuring out what natural selection designed it to accomplish in the environment in which we evolved. The mind, he writes, is a system of "organs of computation" that allowed our ancestors to understand and outsmart objects, animals, plants, and each other.

How the Mind Works (1997/2009) | Steven Pinker

The finding: virtually no change throughout. The conclusion: Your brain, unlike a machine, uses most of its energy "merely in keeping its circuits alive and sensitive," and needs insignificantly little more when you use the circuits. At What Stage of Problem-Solving Does The Human Mind Work Hardest?

The brain is the master organ of the body. The brain takes in all information relating to the body's internal and external environments, and it produces the appropriate responses.

How the Human Brain Works - dummies

The mind is a set of modules, but the modules are not encapsulated boxes or circumscribed swatches on the surface of the brain. The organization of our mental modules comes from our genetic program, but that does not mean that there is a gene for every trait or that learning is less important than we used to think.
