Html And Css Design And

HTML outgrew these new design features, and CSS was invented and released in 1996: All formatting could be removed from HTML documents and stored in separate CSS (.css) files. So, what exactly does CSS stand for? It stands for Cascading Style Sheets -- and "style sheet" refers to the document itself.

Web Design 101: How HTML, CSS, and JavaScript Work

The layout is simple and concise - each double page spread covers an element of CSS, with examples of HTML code, CSS code and the results that appear in your browser. Reading it gives you all the information you need to use CSS, but it also gives you ideas and many 'Ah, so that's how they do that!' moments.

HTML and CSS: Design and Build Websites: Duckett, Jon ...

An internal CSS is used to define a style for a single HTML page. An internal CSS is defined in the <head> section of an HTML page, within a <style> element. The following example sets the text color of ALL the <h1> elements (on that page) to blue, and the text color of ALL the <p> elements to red.
